Vigilo

SOLUTIONS

GPS padlock: know where your cargo is and who opens it

An electronic padlock with real-time tracking, authorized unlocking and instant alerts if anyone tries to force it. All from the Vigilo platform and app.

Real-time tracking | **Remote and card unlocking** | **Cut and tamper alerts** | **Geofences**

HOW IT WORKS

Full control of every opening, from origin to destination

Lock and seal

Pass the steel cable through the door and lock it. The padlock is linked to the platform and starts reporting.

Live tracking

See the position, route and status (open or locked) on the map. Without coverage it stores the data and sends it when the signal returns.

Authorized opening

Open it remotely from the platform, with the app or with an authorized card. Every opening is logged with time and place.

MODELS

Two padlocks, two ways of working

GPS PADLOCK Solar AI

With a solar panel that recharges it and an AI camera that photographs every opening.

- Built-in solar panel: self-charging
- 1080P camera with night vision and AI
- Automatic photo when opening, locking or if the cable is cut

GPS PADLOCK Endurance XL

15,000 mAh battery for long trips without recharging, IP67 waterproof and with a magnet to fit it in seconds.

- 15,000 mAh lithium battery
- IP67 waterproof, -20 °C to +60 °C
- Unlocking by app, card or platform

COMPARISON

Which padlock do you need?

Indicative data per model. Ask us about availability, real battery life depending on reporting frequency, and service conditions.

USES

Where the GPS padlock is used

Containers

Electronic seal for the whole journey, from port to customer.

Trailers and vans

Prevent unauthorized openings at stops and rest areas.

Tankers

Check when and where the loading and unloading hatches are opened.

Warehouses and sheds

Warehouse doors, job sites and sheds with a log of every access.

Want to protect your cargo with the GPS padlock?

We will advise you on the model that best fits your operation.
