Vigilo

SOLUTIONS

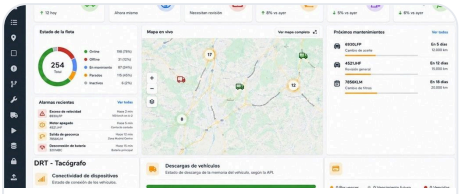

GPS tracking for delivery and field service businesses

Know where every van and every technician is, plan better routes and complete more jobs per day, from your phone or PC.

THE PLATFORM

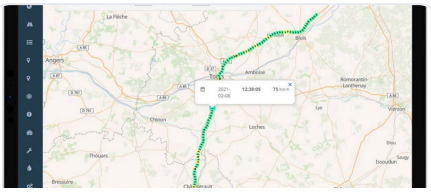

Everything you need, on a single screen

All your vehicles in real time

See every vehicle on the map, its current status and a summary of everything it has done today.

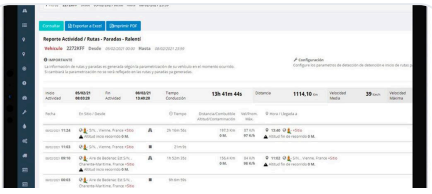

- Position, speed and ignition status
- Instant on-screen alerts
- From your computer, tablet or phone

Route tracking

Review every route your vehicles have driven on the map, with stops, times and full detail.

- Routes by day or date range
- Stops and time spent at each one
- Custom points and geofences

The most complete reports

Activity by vehicle, driver or fleet in clear reports you can understand in seconds.

- Daily, weekly and monthly reports
- Filters by vehicle, driver or period
- Export to Excel and PDF

FROM YOUR PC

The most complete control of all your vehicles

- Activity reports by day, week or fleet
- Route monitoring on the map
- Cargo temperature and humidity
- Tyre pressure and temperature
- Custom points of interest and geofences
- Maintenance plans with reminders

FROM YOUR PHONE

Your fleet in the palm of your hand

Real-time status of every vehicle, instant alerts, route history and remote engine immobilisation whenever you need it.

- Real-time status
- Instant alerts
- Remote engine immobiliser

APP FOR FIELD TECHNICIANSNEW

VIGILO Service: your field services, under control from the phone

- Preventive and corrective maintenance and inspections
- Report with the customer's signature at the end of each job
- Keeps working without signal and syncs automatically
- 01 Android and iOS For each technician's phone
- 02 Works without signal Basements, plant rooms, rural areas
- 03 5 languages Spanish, English, French, Portuguese and Italian
- 04 Connected to Vigilo Same user, same platform

PREVENTIVE MAINTENANCE

Your vehicle maintenance, up to date and never missed

Vigilo keeps track of the mileage, engine hours and dates of every vehicle and alerts you before each service. At a glance you see which vehicles need service now, which to schedule and which are in good shape.

Alerts by miles, hours or date

Every schedule runs on the actual mileage and engine hours from the tracker, not on estimates or spreadsheets.

Nothing goes overdue

Oil, filters, tires, brakes, state inspection: alerts before each due date.

Every vehicle's history

Every job is logged with its date, mileage and cost: useful for warranties, audits and when you sell the vehicle.

Fewer breakdowns on the road

A part replaced on time won't leave the vehicle stranded in the middle of a job.

Scheduled shop visits

Service is planned when it disrupts the least, not when the vehicle breaks down.

Safer drivers

Brakes, tires and steering checked on time: safer for your drivers and for everyone else on the road.

Where you save by keeping maintenance up to date

1. **Cheaper repairs**
   Scheduled service costs less than an emergency repair: parts at regular prices, no rush fees and no knock-on damage to the engine or transmission.
2. **No tow trucks or roadside calls**
   No towing and no sending a mechanic out to wherever the vehicle broke down.
3. **No lost jobs**
   No replacement vehicles, no canceled or subcontracted jobs and no customers waiting because of a breakdown.
4. **Less downtime**
   Drivers aren't left waiting around and the shop works by appointment, with no overtime.
5. **Less fuel**
   Clean filters, fresh oil and proper tire pressure help keep fuel use under control.
6. **Vehicles that last longer**
   Less wear on the engine, brakes and transmission, and a full service record that protects resale value.
7. **No fines or out-of-service orders**
   Inspections on time: no fines and no vehicles sidelined by expired paperwork.

4,410,000 AR$
a year in the 10-van example

"Mileage and maintenance" line in the calculator on this page: 10 % fewer miles and related costs in the example of 10 vehicles. On top of that, every breakdown avoided.
